PARe Services
Assembly & Installation

Notes:

1. All the above prices include 19% VAT.
2. The installation of the glass protective door /cabin takes place only on aligned masonry at an angle of 90 degrees and in accordance with the local building regulations, otherwise the installation cannot take place and the customer will be charged with the amount of €15 (plus charge per zone) for crew visit. The initial amount of the installation service is refundable.
3. The installation of the products cannot take place on plasterboard, autoclaved cellular concrete and other relevant material other than the classic masonry, otherwise the installation cannot take place and the customer will be charged with the amount of €15 (plus charge per zone) for crew visit. The initial amount of the installation service is refundable.
4. It is recommended that bathroom area ceramics are installed before the installation of the protective door/ shower cabin.
5. The installation service is provided in a separate appointment and it is not combined with a furniture installation appointment.
6. The use of bath/shower should take place 24 hours after the installation of the products.
7. The products to be installed should be placed in the relevant area.
8. The assembly crew does not undertake the transport of products between floors and different places.
9. The consumer is not committed to pay if he/she does not receive the relevant invoices – receipts.
10. Gathering of all packaging materials at a predetermined location within the residence, as indicated by the customer.
- . Recycling of all packaging materials, provided that a recycling bin is available within a distance of up to 50 meters

Remarks: Installation appointments for zones 1 and 2 can be arranged within two working days and for zone 3, within three days after delivery.
